ABOUT ME

Junior Software Engineer with more than one year of experience at ITQ, where I built solid skills in Angular, C++, TypeScript and Python on my own through a wide range of projects. I am currently studying Software Engineering at the University of Duisburg-Essen with a focus on Java, Spring Boot and Web3 technologies. Out of curiosity and a passion for continuous learning, I have worked intensively with Java, Spring Boot and the Web3 space, where I keep deepening my expertise. My ability to get into new technologies quickly and create value for innovative projects makes me a fast learner and an effective problem solver. With strong communication and teamwork skills, I look forward to contributing to dynamic development teams and forward-looking projects.

EDUCATION

B.Sc. Applied Computer Science - Software Engineering
University of Duisburg-Essen
2021 - present

Abitur (Computer Science specialization)
Gymnasium Chedli Atallah, Kairouan
2018 - 2019

WORK EXPERIENCE

Junior Software Engineer
ITQ
May 2023 - present

CERTIFICATES

- Master Spring Boot 3 & Spring Framework 6 with Java
- Complete Python Programming 2020: Beginner to Advanced
- Smart Green Island Makeathon

PROJECTS

Gruppe-I
Data Management System
April 2023 - June 2023
Developed a system for managing datasets in CSV and XML format that lets users register, view and edit data. Key features included two-factor authentication, data visualization, geodata integration and discussion forums. The backend used Java and Spring Boot, the frontend Angular.

Bolleyes
AI Recognition App for Böllhof Machine
February 2024 - March 2024
Developed an AI app that recognizes machine parts and provides usage details. Presented a prototype within four days, demonstrating teamwork and problem-solving skills.
